ferti·lome®

- Works up to 5 Seasons • Indoor & Outdoor Use
- Water Conservation At It's Best[†] • Non-toxic
- Mix Well Into Soil

ferti-lome® HydroStretch™ is a specially-formulated soil amendment that stores water & water-soluble nutrients found within the soil. The critical, nutrient-rich moisture is delivered over time to the plant's roots as needed. One application of ferti-lome® HydroStretch™ continues working up to five seasons, increasing your plant's nutrient uptake & emergence well into its maturity.

Application Reference

To ensure proper application amounts, simply follow the chart below.

Container Size	Application Amount	Maximum No. of Treatable Plants
4 inch	1/2 tbsp	40
Quart	1 tbsp	20
6 inch	1-1/2 tbsp	14
8 inch	2 tbsp	10
10 inch	2-1/2 tbsp	8
12 inch	3 tbsp	7

New Plants

1. Prep soil to prepare for planting. 2. Before placing plant, consult the chart & use the recommended amount of ferti-lome® HydroStretch™. 3. Distribute recommended amount liberally on the bottom where plant roots will rest. 4. Place plant directly on top of the ferti-lome® HydroStretch™ so the roots located at the bottom of plant are in contact with the granules. 5. Fill in sides with remaining soil & water generously.

Existing Plants

1. Carefully create holes surrounding the plant using a pencil or similar object. Be sure the hole is deep enough to reach the root system. To avoid root damage, do not create holes too close to the center of the root system. 2. Consult the chart & use the recommended amount. 3. Distribute evenly into holes & carefully guide your ferti-lome® HydroStretch™ to the bottom of each hole created. 4. Cover the top of the holes created with soil & water generously.

CAUTION: Mild irritant. Wear eye protection and gloves. Mouth and nose protection encouraged. Do not ingest. Slippery when wet. Keep out of reach of children.

Store in a dry cool, place. Does not contain plant food or fertilizer.

[†] Cuts watering time up to 1/3

* Results may vary depending on climate, frequency, of watering, soil conditions and plant or container size.
