Dust or dirt on leaves reduces the amount of light available to the plant creating an unhealthy growing condition.

HOW TO USE

Shake well before use.

Water plant thoroughly and remove excess dust and dirt from leaves. Do not apply over other polishes or on infested or diseased plants. Shine tops of leaves only. Avoid spraying in direct sunlight. When spraying indoors, protect area under and around plant with newspaper or other cover. **Before shining any plant, test on a few leaves.** For leaves of potted plants such as Philodendron, Schefflera, or Pothos Ivy. **Not for cut flowers, blooms, or buds.** Apply **Ferti-lome Leaf Sheen** to dry leaves and reapply as needed for best results. No wiping necessary.

Single Plant: Spray about 12" from plant and let mist fall gently over foliage.

Multiple Plants: Spray about 24" or more from plants. Spray with sweeping motion to let mist fall gently over plants.
