Do not use this unit in an area less than 100 cubic feet.

Cover exposed food, dishes and food-handling equipment. Open cabinets and doors to area to be treated. Shut off fans and air conditioners. Put out all flames and pilot lights. Then place fogger on stand or table in the center of the room with valve locked open, placing several layers of newspaper or pad under fogger. Leave building at once and keep building closed for two hours before airing out. Open all doors and windows and allow to air for 30 minutes. Repeat spraying in two weeks or when necessary.

TO KILL TICKS AND FLEAS: Old bedding should be removed and replaced with fresh, clean bedding after treatment. Pets should be treated with a registered product for Flea and Tick control in conjunction with this treatment.
