- Feeds Lawns Naturally

NET WT. 30 LBS. (13.6 KG)

CORN GLUTEN LAWN FOOD 40109

Corn Gluten Lawn Food

9-0-0

A NATURAL CHOICE FOR YOUR LAWN

Put nature to work in your lawn with Natural Guard Corn Gluten Lawn Food 9-0-0.

DIRECTIONS FOR USE

Natural Guard Corn Gluten Lawn Food 9-0-0 is a fertilizer that provides high quality nitrogen which will feed lawns for up to 4 months. May be used on established cool and warm season turf grasses including Kentucky Bluegrass, Perennial Ryegrass, St. Augustine Grass, Bermuda grass, Centipede grass, Bahia grass, and Tall Fescue.

DIRECTIONS: Apply the fertilizer granules with a calibrated spreader in spring, summer and fall at a rate of 10 lbs. per 1,000 sq. ft. of lawn area. If it does not rain within 5 days of application, irrigate with approximately 0.25 inches of water. Maximum number of applications is 3 per year.

APPLICATION INSTRUCTIONS: This product may be applied with drop or rotary-type spreaders designed to apply granular fertilizers. For best results, apply this product evenly and uniformly avoiding streaking, skips or overlaps. Check equipment frequently to verify calibration and proper functioning.

SPREADER SETTINGS

This product can be applied with a drop or broadcast (rotary) spreader. For best results, apply this product evenly and uniformly over the treated area avoiding streaking, skips or overlaps.

Before each application, determine the correct amount (lbs.) of product to place in the spreader hopper for the area to be treated. For example, if the label states to apply 10 lbs. per 1,000 sq. ft. and your area to treat is 2,000 sq. ft. then place 20 lbs. of product in the hopper and set the spreader setting at 9 (per table below) if using an Accugreen drop spreader.

A more uniform application can be made by spreading one-half of the recommended amount of this product over the turfgrass area and then applying the remaining one-half of this product at a right angle to the previous application.

NOTE: The spreader settings listed below are approximate. The speed at which you walk and the working condition of the spreader will affect the rate of application.

CAUTION: The inhibitory properties of this product are non-selective which means it will prevent the formation of germinating lawn grasses. Therefore, the product should not be used within six weeks before desirable grasses are seeded. Do not apply to vegetable gardens or flower beds as it will prevent germination of planted seeds.

NOTE: This product is made with feed grade ingredients. Persons allergic to any of the listed ingredients should not handle this product. Read entire label carefully and use according to directions.

STORAGE: This product is indefinitely stable in cool, dry storage conditions. Store unused fertilizer in the bag and seal tightly. Store out of reach of children and pets.

Not for use in organic crop and food production in California.
