<b>Derived From:</b> Pasteurized Poultry Litter, Porcine Meat and Bone Meal, Dehydrated Alfalfa Meal, Sulfate of Potash Magnesia, Hydrolyzed Feather Meal, Soybean Meal, Sulfate of Potash, and Seaweed Extracts. <b>F370</b>	

**Natural Guard<sup>®</sup> Plant Food** is an all purpose, long-lasting natural plant food to produce vigorous plants, flowers and vegetables.

#### DIRECTIONS FOR USE

**New Plantings:** Dig hole twice as wide and same depth as root ball. Loosen roots and spread them into prepared hole. Remove 1/3 of soil and replace with compost or soil mix. Mix 1-2 cups of **Natural Guard<sup>®</sup> Plant Food** into soil mix. Do not mound the stems. Water thoroughly and add mulch to conserve water and control weeds.

**Established Plants:** Feed trees and shrubs twice a year - spring and fall. Feed flowers and vegetables once per month through the growing season. Sprinkle 1 cup of **Natural Guard<sup>®</sup> Plant Food** around the drip-line of the plant (forming a circle under the plant's outer leaves). For trees and shrubs, use 1 cup for each foot of branch spread (diameter of plant).

**Garden Beds:** Mix **Natural Guard<sup>®</sup> Plant Food** into the top 4 inches of soil at the rate of 3 lbs. per 75 sq. ft.

**Potted Plants:** Mix 1 part **Natural Guard<sup>®</sup> Plant Food** to 25 parts soil. Feed established plants 1 tsp. of **Natural Guard<sup>®</sup> Plant Food** for each 3 inches of pot diameter. Repeat monthly.

#### STORAGE

This product is indefinitely stable in cool, dry storage conditions. Store unused fertilizer in the bag and seal tightly. Store out of reach of children and pets.
