DECIMATE Weed & Grass Killer

Contains: 24.5% Glufosinate-ammonium

- A non-selective herbicide kills weeds and grass plus some woody plants.
 - Is a contact, semi-translocating herbicide that inhibits glutamine synthetase.
 - It inhibits a plant's ability to utilize nitrogen and causing ammonia within the plant to become toxic to the plant.
 - Works in 24 to 72 hours.
 - Works best when temps are over 85° when humidity is high and on bright, sunny days (not overcast).
 - Like glyphosate, it must be absorbed through a green surface of the plant such as; leaf, stem or trunk.
 - Rainfast in ½ hour to 4 hours.
 - May be reseeded or replanted after the spray has dried.
 - Mix 2oz per gallon per 1,000 sq ft.
 - May be used in a greenhouse or shadehouse (on label).
- An Alternative that is Proven to Work!

Always Read and Follow Label Directions
