

Spreader Sticker

Non-Ionic Surfactant

Hi-Yield® Spreader Sticker makes almost all chemicals work better by; breaking down the surface tension of water, making the water spread out giving complete and total coverage on surfaces. **Hi-Yield® Spreader Sticker** helps water to resist the tendency of waxy surfaces to repel water, it also helps water to penetrate through soil and organic matter.

Insecticides: Works with almost all Insecticides:

- Gives complete leaf coverage, increasing absorption, increasing contact kill and creating a better, longer lasting residual control.
- Coats adult insects to improve effectiveness on hard to control insects, such as; Grasshoppers, Stink Bugs, Squash Bugs, etc.
- Helps to penetrate and adhere to webs of Tent Caterpillars and Bagworms.
- Helps drenches to penetrate the soil and adhere to the roots to increase absorption. **Herbicides:**

Works with almost all Herbicides:

- Gives complete leaf coverage, increasing absorption, increasing contact kill and creating a better, longer lasting residual control.
- Must be used with **ferti•lome® Over-the-Top**, **Hi-Yield® Grass Killer**, and **Hi-Yield® Triclopyr Ester**.

Fungicides: Works with almost all Fungicides:

- Gives complete leaf coverage, increasing absorption, increasing contact kill and creating a better, longer lasting residual control.

Fertilizers: Works with almost all fertilizers:

- Gives complete leaf coverage, increasing absorption, increasing contact kill and creating a better, longer lasting residual control.
- Increases the penetration and adheres the fertilizer to the roots for better absorption, thus making it work better.

Avoid Use With:

Do NOT use Hi-Yield® Spreader Sticker with the following products: ferti•lome® Weed Free Zone; this product is "HOT" enough already and you may burn portions of the yard. Any Oil Products such as: ferti•lome® Horticultural Oil or Hi-Yield® Dormant Oil, also Neem Oil including ferti•lome® Triple Action, ferti•lome® Fruit Tree Spray and Natural Guard® Brand by ferti•lome® Neem.

Do Not Use Dish Soap! Dish soap is ionic so it can react with the chemical, it also leaves a sticky residue and most soaps have degreasers that burn plants, often faster than the chemical can work.

Dilution - Coverage Comparison

- Dilution Rates: 1 to 2 teaspoons per gallon of water when mixed with insecticides, miticides, fungicides, liquid fertilizers and herbicides.

8 oz. bottle of Hi-Yield® Spreader Sticker:

- At 1 teaspoon per gallon - yields 48 gallons of mix will cover 48,000 sq. ft.
- At 2 teaspoons per gallon - yields 24 gallons of mix will cover 24,000 sq. ft.

Pint bottle of Hi-Yield® Spreader Sticker:

- At 1 teaspoon per gallon - yields 96 gallons of mix will cover 96,000 sq. ft.
- At 2 teaspoons per gallon - yields 48 gallons of mix will cover 48,000 sq. ft.

Gallon bottle of Hi-Yield® Spreader Sticker:

- At 1 teaspoon per gallon - yields 768 gallons of mix will cover 384,000 sq. ft.
- At 2 teaspoons per gallon - yields 384 gallons of mix will cover 192,000 sq. ft.

Without Hi-Yield® Spreader Sticker, spray beads up

With Hi-Yield® Spreader Sticker, spray covers evenly

Available in three sizes

8oz – 31061

16oz – 31062

Gallon – 31063
