

Herbicide Enhancer

Make Your Herbicides Work BETTER!

Contains: AMS / Defoamer / Drift Reduction Solution / Surfactant

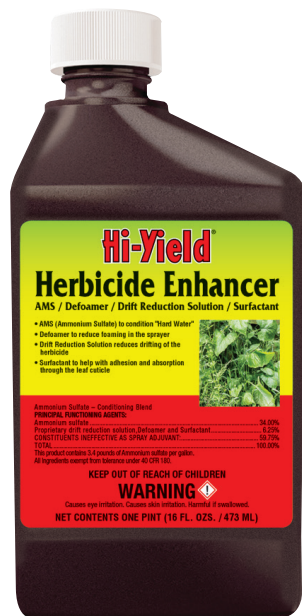

AMS - Ammonium Sulfate to condition "hard water". Increases effectiveness of the herbicide in high Calcium water and high pH water.

Defoamer - Additive to reduce foaming during mixing, agitation and spraying.

Drift Reduction Solution - Additive to help reduce the chemical and physical drift of the herbicide physical drift of the herbicide both during and after application.

Surfactant - Additive to allow better adhesion and absorption of the herbicide into the waxy leaf of the weed

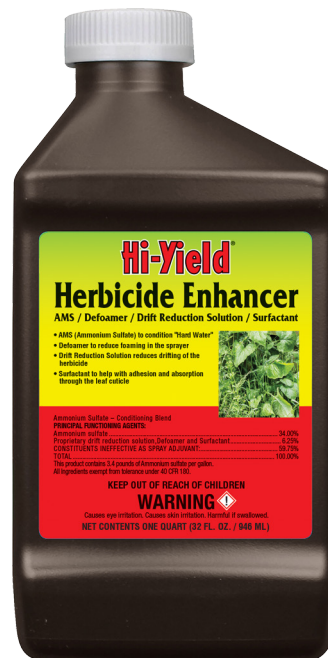

Mix 1 to 6 ounces per gallon of spray solution. Use the higher rate when extreme hard water conditions exist.

Herbicide Enhancer 16oz

Case of 12

Item number: 31073

Herbicide Enhancer 32oz

Case of 12

Item number: 31074
