Hi-Yield®

Grower's Special

DIRECTIONS FOR USE

HI-YIELD® GROWER'S SPECIAL is designed for controlled feeding of container plants, trees and shrubs. The slow release Nitrogen in HI-YIELD® GROWER'S SPECIAL reduces the risk of Nitrogen burn.

CONTAINER PLANTS

Apply one teaspoonful per 6 inch pot and 2 tablespoons per square foot of soil surface in large containers every 6 weeks during the growing season. Apply by sprinkling a light coating over container surface being careful not to pile fertilizer next to the stem of the plant.

SHRUBS AND ORNAMENTALS

In early spring, apply 1 ½ to 2 lbs. per 100 sq. ft. (10'x10') area broadcast lightly over soil under spread of branches to just beyond. Again in the fall apply 1 lb. per 100 sq. ft. of area for continued feeding and winter protection.

TREES

Fertilize your trees by spreading evenly to ground out under the widest spread of branches to slightly beyond. Feed your trees twice a year (in early spring and late fall) by applying 3 lbs. of HI-YIELD® GROWER'S SPECIAL for each inch of trunk diameter. Water in well after application.
