# Blooming & Rooting

## Soluble Plant Food

### 1. WHAT IS THIS PACKAGE FOR?

ferti•lome® BLOOMING & ROOTING SOLUBLE PLANT FOOD is a highly concentrated plant food and must be dissolved in water before use. ferti•lome® BLOOMING & ROOTING SOLUBLE PLANT FOOD helps promote vigorous blooming and root development for most all plants, and may be used as a soil application, foliage feeding, or as a rooting solution.

### 2. HOW DO YOU USE IT?

#### POTTED OR CONTAINER PLANTS:

**Soil Application:** Dissolve 1 teaspoon in 1 gallon of water. Apply with each watering until desired color and blooming is achieved, then every other watering to help maintain vigorous growth.

**Foliage Feeding:** Dissolve 1/4 teaspoon in 1 quart of water and spray foliage until thoroughly wet every 7 to 10 days. Be sure soil is moist before foliar feeding.

#### OUTDOOR PLANTS:

**Soil Application:** Dissolve 2 tablespoons in 1 gallon of water. Apply 1 quart per square foot of planted area. Repeat every 7-14 days.

**Foliage Feeding:** Dissolve 1 tablespoon in 1 gallon of water and using a sprinkler can or hose-end sprayer, wet each plant thoroughly. Apply every 7 to 10 days during the growing season.

#### ROOTING SOLUTION:

Dissolve 1 teaspoon in 1 gallon of water and apply to planting hole and over soil as roots are being covered. When practical, soak entire root system thoroughly.

### 3. HERE ARE THE RESULTS YOU MAY EXPECT!

ferti•lome® BLOOMING & ROOTING SOLUBLE PLANT FOOD helps promote more beautiful blooms, lush green foliage, and stronger root development.
