 - **Ideal for use when planting or rooting**
 - **Use every time you water**

NET WEIGHT 1.5 LBS. (680 G)

ferti•lome®

Blooming & Rooting

Soluble Plant Food

ferti•lome® BLOOMING & ROOTING SOLUBLE PLANT FOOD is a highly concentrated plant food and must be dissolved in water before use. **ferti•lome® BLOOMING & ROOTING SOLUBLE PLANT FOOD** helps promote vigorous blooming and root development for most all plants, and may be used as a soil application, foliage feeding, or as a rooting solution.

POTTED OR CONTAINER PLANTS

Soil Application: Dissolve 1 teaspoon in 1 gallon of water. Apply with each watering until desired color and blooming is achieved, then every other watering to help maintain vigorous growth.

Foliage Feeding: Dissolve ¼ teaspoon in 1 quart of water and spray foliage until thoroughly wet every 7 to 10 days. Be sure soil is moist before foliar feeding.

OUTDOOR PLANTS

Soil Application: Dissolve 2 tablespoons in 1 gallon of water. Apply 1 quart per square foot of planted area. Repeat every 7-14 days.

Foliage Feeding: Dissolve 1 tablespoon in 1 gallon of water and using a sprinkler can or hose-end sprayer, wet each plant thoroughly. Apply every 7 to 10 days during the growing season.

ROOTING SOLUTION

Dissolve 1 teaspoon in 1 gallon of water and apply to planting hole and over soil as roots are being covered. When practical, soak entire root system thoroughly.

ferti•lome® BLOOMING & ROOTING SOLUBLE PLANT FOOD helps promote more beautiful blooms, lush green foliage, and stronger root development.
