## Fire Ant Control with Acephate

Insecticide for control of Fire Ants.

### Application Rates:

Evenly distribute 1 to 2 teaspoons over the Fire Ant mound.  
Do not disturb the mound.

For best results apply the material in the early morning or late afternoon when the ants are most active. Applications made under prolonged hot and dry conditions may be ineffective due to the location of the ants deep within the nest. Grass in treated area may be injured. Always Read and Follow Label Directions
