Chelated Iron EDDHA 6% Water Soluble

Contains: 6% Chelated Iron
Derived from: Ferric ethylenediamine (FeEDDHA)

- Is a water-soluble powder.
 - A chelated iron for use on Alkaline soils, especially soils with a pH above 7.
 - Use to prevent and correct Chlorosis.
 - Apply in the Spring as a preventative or as needed through-out the season.
 - Use on Trees, Shrubs, Ornamentals, Flowers and Vegetables.
 - Mix with water and pour under the plant you want and water in.
 - Not designed to be sprayed
 - Use Chelated Liquid Iron for soils with a pH below 6.0 and are low in Calcium.
 - The Liquid Iron can be absorbed through the leaf
- Always Water After Application!

Always Read and Follow Label Directions
