- For foliar & soil applications
- Contains chelated iron, copper, manganese & zinc.

NET CONTENTS ONE QUART (32 FL. OZ. / 946 ML)
1. WHAT IS THIS PACKAGE FOR?
ferti•lome® developed this product for quick, economical and easy
correction of Iron deficiency (yellowing of foliage) and other similar
nutrient deficiencies in potted plants, shrubs, lawns, citrus and shade
trees, flowers and vegetables.

NOTE: ferti•lome® CHELATED LIQUID IRON should not be substituted
for fertilizer, but should be used in addition to your regular, monthly
fertilizer program.

1. HOW DO YOU USE IT?

**SHRUBS AND CITRUS TREES** (including Avocados and Mangoes

**Foliage Spray:** Mix 1 tablespoon per gallon of water. Apply a thorough
foliage spray to both sides of leaves. For citrus, apply every two weeks
during the months of January, February and March or during budding and
blooming. Any excess that runs off will drip down onto the root feeding
zone and give longer lasting results.

Soil Application: Lightly cultivate the ground out under the widest spread of branches and apply ferti•lome® CHELATED LIQUID IRON according to the following chart:

<table>
<thead>
<tr>
<th>PLANT HEIGHT</th>
<th>TABLESPOONS PER GALLON WATER</th>
<th>APPLY GALLONS OF DILUTED SOLUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 2 ft.</td>
<td>2</td>
<td>1</td>
</tr>
<tr>
<td>2-3 ft.</td>
<td>4</td>
<td>2</td>
</tr>
<tr>
<td>3-4 ft.</td>
<td>8</td>
<td>3</td>
</tr>
<tr>
<td>4-5 ft.</td>
<td>10</td>
<td>4</td>
</tr>
</tbody>
</table>

For larger plants and shrubs, mix 1-2 cups (8-16 fl. ozs.) per gallon of water. Apply sufficient solution dilute to thoroughly cover ground area out under widest spread of branches. Soak thoroughly with water after treatment.

LAWNS AND TREES
Apply 1 pint per 500 sq. ft. Any convenient method of application may be used. If a quart hose-on sprayer is used, dilute 1 pint of ferti•lome® CHELATED LIQUID IRON with equal volume of water and apply with sufficient water to cover 500 sq. ft.

FLOWERS AND VEGETABLES
Foliage Spray: Follow directions for foliage spray under shrubs. Soil Application: Cultivate the ground lightly and apply 2 tablespoons ferti•lome® CHELATED LIQUID IRON per gallon of water to 10 sq. ft. Soak thoroughly with water after treatment.
POTTED PLANTS
Mix 1/2 teaspoon per quart of water. Apply 1 cup of mixture per 6 inch pot. Less for smaller pots and more for larger pots. Repeat monthly until plants regain their color.

3. HERE ARE THE RESULTS YOU MAY EXPECT!
Application of ferti•lome® CHELATED LIQUID IRON aids production of vigorous, dark green plant growth and correction of micro nutritional deficiencies due to lack of available Iron, Copper, Manganese and Zinc.
