LIQUID HUMIC ACID

• May aid in the uptake of micro-nutrients.

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS ONE QUART (32 FL. OZ. / 946 ML)

Natural Guard® Brand by ferti•lome® HuMic

APPLICATION RATES

For HOSE-END SPRAYERS - Apply 6 oz. per gallon of water to cover 1000 sq. ft. in the spring at four week intervals to reduce the stress on your plants due to infrequent watering, and maximize the vitality of your garden, lawn or beds. Care should be used in spraying bedded plants or garden plants with the tank sprayer, aiming to keep the product off the leaves and flowers.

For DRIP SYSTEMS - This product is great for use in above- and below- ground drip systems. Smaller amounts may be applied over several irrigations instead of over one application. It can be applied every two weeks for maximum benefit.

For HOUSE PLANT APPLICATION - Apply 1 to 2 tablespoons per 1 quart of water to soil every 2 to 4 weeks.

CONTAINS NON-PLANT FOOD INGREDIENT
12% Humic Acid derived from Leonardite
